Dated: Apr 16, 2010

Numeric Computer Systems integrates its Xpedium xMobility Suite with VAI's S2K Software to enable mobile workers to perform various tasks on a mobile device.

Hauppauge, N.Y. – March 31, 2010 – Numeric Computer Systems' (NCS) (www.ncssuite.com), Xpedium division (www.xpedium.com) a leading provider of mobility solutions that allow mobile workers to execute a variety of functions using a handheld mobile computer or smartphones, today announced a partnership with VAI (Vormittag Associates, Inc.) (www.vai.net), a leader in enterprise solutions for the distribution, manufacturing, retail and service industries, and an IBM Premier Business Partner.

Numeric Computer Systems' (NCS) (www.ncssuite.com) Xpedium division (www.xpedium.com) is a leading provider of mobility solutions that allow mobile workers to execute a variety of functions using a handheld mobile computer or smartphone. Tasks such as surveys, orders, shelf audits, cash collections and invoices are configured in a workflow to effectively and efficiently capture and report data to the enterprise on a real-time basis. The complete solution includes the Xpedium xLink middleware solution to allow accurate and secure communications and transaction updating between the mobile device and VAI's S2K Enterprise Software. xLink does this through an interface with S2K to maintain an electronic record of all transactions.

VAI (Vormittag Associates, Inc.) (www.vai.net), a leader in enterprise solutions for the distribution, manufacturing, retail and service industries, and an IBM Premier Business Partner, today announced a partnership with Hauppauge, N.Y.-based Numeric Computer Systems, Inc. (www.ncssuite.com) to provide its Xpedium xMobility Suite of products to enable the mobile worker to perform various tasks in the field.

VAI's S2K Enterprise Software is a comprehensive software suite that provides companies with the power to streamline business operations, manage the supply chain, reduce costs and improve customer satisfaction—crucial to successfully competing in today's tough economic climate.

VAI's integration of the NCS Xpedium xMobility Suite benefits companies by offering an electronic, real-time means of capturing source data and transmitting it real-time for processing, while ensuring the most up-to-date and accurate information for decisions made by the enterprise. The capture of signatures, pictures and other data will reduce paper costs and handling and increase cash flow.

Joseph Scioscia, Director of Sales, VAI, commented, "VAI had been looking for a partner for its S2K Enterprise to enhance our mobility offerings, and seized the opportunity to work with NCS on its platform to deliver this functionality. This relationship will provide a complete mobility solution that is comprehensive, integrated and scalable."

"VAI's world-class enterprise solutions are the perfect platform for our Xpedium Mobility software," said Bob Zink, Executive Vice President of Sales and Marketing, Xpedium division of Numeric Computer Systems. "Integrating the Xpedium xMobility System into the S2K Software Suite will deliver valuable enhancements for VAI customers and provide the capacity for immediate tracking of transactions being created outside the four walls of the enterprise."

About Numeric Computer Systems, Inc.

Numeric Computer Systems, Inc. is a premier global provider of supply chain execution solutions

supporting the Direct Store Delivery process. Designed for the demands of the direct store delivery (DSD) market, NCS automates both back office functions and the requirements of mobile sales/delivery workers focusing on the fast moving consumer goods industry including baked goods, beverages, dairy, frozen foods and snacks.
